

POWER TO THE TEACHER

CLASS  Creative Leadership Achieves Student Success

A supercharged career program gives educators the power to be their best.

At the Chalkboard Project, we believe educators have unlimited power to grow and excel. What's needed is a system that honors their skills and unleashes their potential. That's why we developed CLASS – Creative Leadership Achieves Student Success. It gives educators new ways to achieve excellence. And it rewards them when they do.

Two districts are now beginning to pilot CLASS programs with funding from Chalkboard. Teachers, administrators, school board members and others are designing the programs. Their work will help supercharge the teaching profession in Oregon, leading to increased student achievement and better schools. And that will help Oregon step to the head of the CLASS.
